

Interior Designers

Interior Designers and Decorators Leave your clients with a well protected newly designed home experience. Your client will appreciate the efforts you have taken to ensure their new upholstered furniture will be protected against staining from any food or beverages normally consumed by humans, human blood, urine as well as mold and mildew. This furniture protection program allows you, the interior designer the opportunity to help protect your client's furniture investment. Protect Your Furniture offers referral fee for every client that utilizes the protection services. To have your clients furniture protected call us at 646.812.5858 or email us at alevine@metroguardian.net with your clients name, phone number and a brief description of your clients needs. A Protect Your Furniture representative will contact your customer to discuss all details, procedures and scheduling. Protect Your Furniture's Fabric Protection Program protects your client's newly purchased fabric upholstered furniture and effectively guards it from both water and oil-based stains caused by food and beverages normally consumed by humans. It also helps provide a protective barrier against stains caused by all human or pet bodily fluids and is backed by an insured 5 year stain protection warranty*. Increase new upholstered furniture fabric's lifetime by up to 50%. An advanced fluoropolymer formula developed to permanently protect fabric. Bonds to each fiber without affecting the look, feel or breathability of the fabric. Non-toxic and completely safe for humans and animals. A special U.V. inhibitor to help reduce color fading. Anti-Static additive which helps repel airborne dirt and dust in your fabric remaining cleaner and requiring less maintenance. Permanently affixed to fabric unlike other protectors which require reapplications every year or two. Five years of warranty service. All warranties are insured and serviced by the Guardian Fabric Protection Program. Guardian has been providing protection for fabrics and leather for almost thirty years.
